

Requirement Analysis
Solution Requirements (Functional & Non-functional)

Date	14 July 2026
Team ID	
Project Name	Cosmetics Insights
Maximum Marks	4 Marks

Solution Requirements:

The solution requirements describe what the Cosmetics Insights Dashboard is expected to do and the quality standards it should meet. The functional requirements focus on the main features, such as analyzing sales, exploring product performance, understanding customer trends, and using interactive visualizations. The non-functional requirements ensure that the dashboard is easy to use, performs efficiently, provides reliable insights, and can be updated as new data becomes available. These requirements serve as a guide for developing a practical and user-friendly business intelligence solution.

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Dashboard Access	Open the Tableau dashboard. Load the cosmetics sales dataset. Display the main dashboard with key business metrics.
FR-2	Sales Analysis	View total sales and profit. Analyze sales trends over different time periods. Compare sales across different regions.
FR-3	Product Analysis	View product categories. Identify the best-selling and least-selling products. Compare product performance.
FR-4	Customer Insights	Understand customer purchasing patterns. Analyze customer segments. Identify customer preferences based on sales data.
FR-5	Interactive Dashboard	Apply filters for products, categories, and regions. Update charts instantly based on the selected filters. Explore data through interactive visualizations.
FR-6	Reports & Story	Display dashboards and KPIs. Present business insights using Tableau Story. Share or export dashboard reports when needed.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The dashboard should be simple to navigate so that users can understand the data without difficulty.
NFR-2	Security	The dashboard should ensure that the dataset remains secure and is accessed only through authorized Tableau platforms without altering the original data.
NFR-3	Reliability	The dashboard should display accurate and consistent information based on the available dataset.
NFR-4	Performance	The dashboard should load quickly and respond smoothly when filters or charts are used.
NFR-5	Availability	The dashboard should be accessible through Tableau Public whenever an internet connection is available.
NFR-6	Scalability	The dashboard should allow new data and additional visualizations to be added in the future.
